

ACTIVE CONSTITUENT: 865 g / L CANOLA OIL

For use as an Adjuvant to improve spray droplet deposition, wetting and spreading and reduce evaporation.

NEXUS provides the following benefits for spray applications;

- reduces evaporation of spray droplets whilst in flight and from spray deposits
- improves wetting sticking and spreading of spray deposits - is biodegradable and based on natural oils

The Australian Solution

DIRECTIONS FOR USE

SITUATION	APPLICATION RATE	CRITICAL COMMENTS
Broadacre and Boom Spray	200 mL - 500 mL / 100L	Use the lower rate when using low application rate products
Hand Gun	100 mL = 200 mL / 100L	
CDA or ULV	1L-2L/ha	
Tree Crops (high volume)	100 - 200 mL / 100 L	
Vegetables	150 - 200 mL / 100 L	
Knapsack	20 = 30 mL / 10 L	

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIOD: NOT REQUIRED WHEN USED AS DIRECTED.

GENERAL INSTRUCTIONS

NEXUS is an emulsifiable vegetable oil product which is suitable for use with herbicides, insecticides and fungicides. It can increase pesticide activity by improving spray deposition, increased wetting and reducing evaporation of spray deposits. NEXUS is non-phytotoxic at recommended rates.

Prior to use, read all directions on this label and on the label of the pesticide product being used. Any specific usage or restrictions on the pesticide's label have precedence over directions for use referred to on this label.

MIXING INSTRUCTIONS

NEXUS mixes quickly and easily with water and should be added directly to the spray tank after the addition of pesticide. It should not be premixed with any other product prior to adding into the spray tank. Maintain good agitation while spraying.

COMPATIBILITY

NEXUS is compatible with most herbicides, insecticides and fungicides. Always check the label of the pesticide for any adjuvant or compatibility restrictions before use.

CROP SAFETY

Refer to the directions on the pesticide product label. Caution must be exercised when applying NEXUS with agricultural chemical products on sensitive crops during periods when plants are subject to drought stress, high temperatures or high humidity. If in doubt about the appropriateness of using NEXUS, please test by application to a small area before using it on a full-scale basis.

PROTECTION OF WILDLIFE, FISH, CRUSTACEA AND ENVIRONMENT

Do not contaminate streams, rivers or waterways with the chemical or used containers.

GENERAL INSTRUCTIONS cont.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container, in a well-ventilated area out of direct sunlight. Triple, or preferably pressure rinse containers before disposal. Add rinsing to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

REFILLABLE CONTAINERS

If returning containers for refill do not rinse, instead replace cap and re-turn to designated collection point.

SAFETY DIRECTIONS

Avoid contact with skin and eyes. Wear overalls, rubber gloves, goggles or disposable face shield. After each day's use, wash contaminated clothing, gloves and face shield with soap and water.

WHEN USING TOGETHER WITH OTHER CHEMICALS CONSULT THEIR SAFETY DIRECTIONS.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126.

MATERIAL SAFETY DATA SHEET

Additional information is listed in the Material Safety Data Sheet which can be obtained from the supplier.
