STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging for appropriate disposal to an approved waste management facility. If an approved waste management facility is not available bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. DO NOT burn empty containers or product.

SAFETY DIRECTIONS

When preparing spray wear elbow-length PVC gloves. After each day's use, wash gloves.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre.

Phone Australia 131 126.

MATERIAL SAFETY DATA SHEET

If additional hazard information is required refer to the Material Safety Data Sheet available from your supplier.

DIRECTIONS FOR USE

Crop	Disease	Rate	Critical Comments
Apples	Black spot (scab) (<i>Venturia inaequalis</i>),	Dilute spraying 10 g/100 L	Application may commence at spurburst for black spot/scab, and at early pink stage for powdery mildew control. Apply at 7 to 10 day intervals prior to petal fall and during periods of rapid growth.
	Powdery mildew (<i>Podosphaera leucotricha</i>)	Concentrate spraying Refer to the Application Section in General Instructions	Later applications should be at 10 to 14 day intervals, or according to prevailing weather conditions and disease incidence.
Pears	Scab (<i>Venturia pirina</i>)		<p>Apply by dilute or concentrate spraying equipment. Apply the same total amount of product to the target crop whether applying this product by dilute or concentrate spraying methods.</p> <p>DO NOT use in equipment that requires concentrations greater than 50g KRESTA[®]/100 L water (5x concentration), as crop safety has not been assessed at these concentrations. Ensure thorough and even coverage of all plant parts. May be used with the recommended rate of a non-ionic wetting agent.</p> <p>The use of KRESTA[®] is subject to a CROPLIFE Resistance Management Strategy. DO NOT apply more than three applications of KRESTA[®] or other Group 11 fungicides per season. Refer to Resistance Management Strategy in General Instructions for further details.</p>

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIODS:

APPLES, PEARS : DO NOT HARVEST FOR 6 WEEKS AFTER APPLICATION.
DO NOT GRAZE AREAS UNDER OR SURROUNDING TREATED TREES,
OR CUT FOR STOCK FOOD, FOR 2 WEEKS AFTER APPLICATION

GENERAL INSTRUCTIONS

FUNGICIDE RESISTANCE WARNING

GROUP	11	FUNGICIDE
-------	----	-----------

EuroChem® KRESTA® Strobilurin 500 WG Fungicide (“KRESTA®”) is a member of the strobilurin group of fungicides. For fungicide resistance management **KRESTA®** is a Group 11 fungicide. Some naturally occurring individual fungi resistant to the **KRESTA®** and other Group 11 fungicides may exist through normal genetic variability in any fungal population. The resistant individuals can eventually dominate the fungal population if these fungicides are used repeatedly. These resistant fungi will not be controlled by **KRESTA®** or other Group 11 fungicides, thus resulting in a reduction in efficacy and possible yield loss. Since the occurrence of resistant fungi is difficult to detect prior to use, TGAC Australia Pty Ltd accepts no liability for any losses that may result from the failure of **KRESTA®** to control resistant fungi.

RESISTANCE MANAGEMENT STRATEGY

To prevent or delay the onset of resistance, do NOT apply more than three sprays per season of **KRESTA®** or other Group 11 fungicides. If two or three consecutive applications of Group 11 fungicides are used, then they must be followed by at least the same number of applications of fungicide(s) from a different group(s) before a Group 11 fungicide is used again, either in the current or following season.

INTEGRATED PEST MANAGEMENT

KRESTA® is suitable for use in Integrated Pest Management (IPM) programs.

EXPORT OF TREATED FRUIT

Growers should note that MRL's or import tolerances do not exist in all markets for fruit treated with **KRESTA®**. If you are growing fruit for export, please check with TGAC Australia Pty Ltd or the relevant industry or regulatory authorities for the latest information on MRL's and import tolerances BEFORE using **KRESTA®**.

EQUIPMENT

Ground Application: **KRESTA®** can be applied with high volume (dilute) or low volume (concentrate) orchard spraying equipment that is fitted with mechanical or hydraulic agitation. Equipment should produce a fine, uniform spray coverage of all plant surfaces (stems, leaves and fruit).

Aerial Application: Do NOT apply by aircraft.

Mixing

EuroChem® KRESTA® Strobilurin 500 WG Fungicide is a water dispersible granule (WG) fungicide that mixes readily with water. Add the required amount of **KRESTA®** directly to the half filled spray vat with agitators in motion. Complete the filling of spray vat under constant agitation. Do NOT allow the spray mixture to remain in the tank for long periods without agitation.

Application

Dilute spraying:

- Use a sprayer designed to apply high volumes of water up to the point of run-off and matched to the crop being sprayed.
- Set up and operate the sprayer to achieve even coverage throughout the crop canopy. Apply sufficient water to cover the crop to the point of run-off. Avoid excessive run-off.
- The required water volume may be determined by applying different test volumes, using different settings on the sprayer, from industry guidelines or expert advice.
- Add the amount of product specified in the Direction for Use table for each 100 L of water. Spray to the point of run-off.
- The required dilute spray volume will change and the sprayer set up and operation may also need to be changed, as the crop grows.

Concentrate spraying:

- Use a sprayer designed and set up for concentrate spraying (that is a sprayer which applies water volumes less than those required to reach the point of run-off) and matched to the crop being sprayed.
- Set up and operate the sprayer to achieve even coverage throughout the crop canopy using your chosen water volume.
- Determine an appropriate dilute spray volume (see Dilute spraying above) for the crop canopy. This is needed to calculate the concentrate mixing rate.
- The mixing rate for concentrate spraying can then be calculated in the following way:

Example only

1. Dilute spray volume as determined above: for example 1,500 L/ha
 2. Your chosen concentrate spray volume: for example 500 L/ha
 3. The concentration factor in this example is: 3 x (ie $1,500 \text{ L} \div 500 \text{ L} = 3$)
 4. If the dilute label rate is 10 g/100 L, then the concentrate rate becomes 3 x 10; that is 30 g/ 100 L of concentrate spray.
- The chosen spray volume, amount of product per 100 L of water, and the sprayer set up and operation may need to be changed as the crop grows.
 - For further information on concentrate spraying, users are advised to consult relevant industry guidelines, undertake appropriate competency training and follow industry Best Practices.

Compatibility

KRESTA[®] is compatible with Acaban[®], carbaryl 500, Gusathion[®] SC, Insegar[®], Klartan[®], Lorsban[®] 250 WP, Mimic[®] 700 WP, Pyranica[®] and Thiodan[®] EC. For information on compatibility with other products please contact your local reseller or TGAC Australia Pty Ltd representative.

DO NOT mix with Omite[®] or products giving an alkaline reaction eg: Bordeaux mixtures or lime sulphur.

RAINFALL

KRESTA[®] exhibits good rainfastness once spray has dried on the tree, however its protectant cover may be reduced after 50-60 mm of rainfall.

PRECAUTION

Re-entry period

Avoid entering treated areas until spray deposits have dried. When prior entry and handling of treated surfaces is necessary wear rubber gloves.

PROTECTION OF LIVESTOCK

KRESTA[®] presents a low hazard to bees and can be applied to crop at any time.

PROTECTION OF WILDLIFE, FISH, CRUSTACEA AND ENVIRONMENT

HIGHLY TOXIC TO AQUATIC ORGANISMS.

DO NOT apply if heavy rains are imminent.

DO NOT contaminate streams, rivers or waterways with this product or used container.

DRIFT WARNING

DO NOT apply under weather conditions or from spraying equipment, which could be expected to cause spray to drift onto adjacent crops, crop lands, pasture or livestock.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. **DO NOT** dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging for appropriate disposal to an approved waste management facility. If an approved waste management facility is not available bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. **DO NOT** burn empty containers or product.

SAFETY DIRECTIONS

When preparing spray wear elbow-length PVC gloves. After each day's use, wash gloves.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre.

Phone Australia 131 126.

MATERIAL SAFETY DATA SHEET
