Email: info@naked-pools.com

DIRECTIONS FOR USE:

A registered sanitiser MUST be used with this product when the pool is used for bathing.

DO NOT use bromine products or soda ash.

Set up and operate the system according to manufacturer's instructions to deliver 0.3 to 0.6mg/L of copper.

Copper concentration in the water must not exceed 1mg/L

**NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER
CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER
APPROPRIATE LEGISLATION.**

GENERAL INSTRUCTIONS

1. Ensure pool water is chemically balanced by regular testing as directed on the label for the sanitiser you are using.
2. Test the copper levels in the water at least monthly using an appropriate copper test kit. Copper levels are directly proportional to ioniser run time. Should the copper level approach or exceed 1mg/L, simply unplug the ioniser or reduce ioniser running time until the recommended level is reached. To increase copper levels, increase the ioniser running time.
3. Check sanitiser levels regularly and adjust according to instructions on those products.

STORAGE & HANDLING

Store in original carton in a cool dry place out of reach of children. DO NOT store in direct sunlight. Dispose of carton in recycling after opening.

APVMA Approval no. 83498/108488
